Magic Cinema 4D: An experience for all senses - since 2003, Europa-Park visitors can experience the world of 4D

Since April 2003, visitors of Germany's largest theme park have the chance to travel into the 4th dimension. The new 448-seat 4-D theater, which is situated in the French themed area, is a spectacular attraction for the whole family.

Equipped with surround-sound and a gigantic screen measuring 19 x 9 meters, the "Magic Cinema 4D" provides visitors with a different view of the Earth and its wildlife. In the film "Panda Vision?", visitors meet a panda daydreaming of a better world. They dive into the dream, encounter other animals and go on a wonderful expedition through the marvels of our Earth. The sea turtle takes the visitors into the depths of the ocean with its colourful reefs and the diverse flora and fauna. Children as well as adults are thrilled by the little monkey that romps around the treetops of the jungle, swinging from branch to branch. Also the clear and icy landscape of the Antarctica with its jolly penguins and clumsy polar bears fascinates everybody - in "Panda Vision?" the visitors are enchanted by the animal world and nature of our Earth.

In cooperation with the World Wide Fund for Nature (WWF Germany), the world's biggest nature conservation organization, Europa-Park presents a fantastic voyage in 4-D through the natural wonders of our planet - colorful, memorable and full of surprises. With the help of advanced computer animation animals and landscapes, which "surround?" the visitors and take them into another reality, have been created. The awareness of our environment is being improved by presenting it as something fascinating and great, but also showing that it is vulnerable and can be easily destroyed. A unique and breathtaking experience - welcome to the Fourth Dimension!
